

Asadullah Hamidi

Data Engineer | Python Developer | Snowflake • AWS • Airflow • dbt • Databricks • PySpark
+91-7700852675 • asad.hamidi119@gmail.com • [linkedin.com/in/asadullah-hamidi](https://www.linkedin.com/in/asadullah-hamidi) • github.com/asdhamidi

EXPERIENCE

- Deloitte USI

Associate Data Engineer

Data Platform Engineering

- Automated ELT pipelines for **40+ KPIs**, combining **Airflow** orchestration (**20+ DAGs**) and **dbt** transformations (**30+ models**) to improve reliability.
 - Developed a **config-driven Python framework** for Snowflake artifact generation (**100+ /run under 60s**), reducing report turnaround time for **200+ KPIs**.
 - Engineered a fault-tolerant artifact delivery system with zipping and Snowflake to SharePoint publishing, sustaining **99% uptime** after 1 year of monitoring through audit framework.
 - Led cross-functional data discovery and pipeline design across 24 Salesforce tables to implement 3 core KPIs; eliminated **2.2M+** duplicates and achieved **99.9%** data completeness.

Hyderabad, Telangana, India
November 2023 – Present
- Databricks Engineering

- Implemented a modular PySpark and AWS ingestion framework on Databricks to modernize legacy ETL, cutting total processing time from **4-5 hours to under 1.5 hours** across **400+ tables**.
 - Built a fetch-write-discard streaming pipeline for Salesforce ingestion, handling oversized records reliably across 100+ objects from **10k records to 400M records**.
 - Refactored pipeline metadata control by migrating a legacy **127K-record MySQL setup** to a centralized Snowflake framework, enabling dynamic task execution across **400+ tables**.
 - Implemented an Audit, Balance, and Control (ABC) system with rule-based **data-quality checks**, automated watermarking, and enabling real-time Teams/email failure alerts.
- Applied AI

- Architected a multi-agent analytics platform using Snowflake Cortex AI, enabling 70+ scientists to query **750M+ medical records** via natural language.
 - Designed a custom framework and agentic query decomposition system to parse complex, multi-criteria clinical prompts into a structured JSON schema with **93% accuracy**.
 - Engineered a high-performance self-healing SQL generator with autonomous validation & correction, **boosting query speed by 9x** on **85B+ row datasets** via progressive data reduction and clustering.
 - Built integrated code validation with real-time Cortex Search lookup across 4 vocabularies for **400K+ clinical codes** used in query definitions.

PROJECTS

- WingWatch - Apache Airflow, dbt, PostgreSQL, Docker, MinIO, Grafana, OpenSky API

– An aviation monitoring system delivering analytical insights into air traffic, flight phases, emergencies, and trends.

Built automated dbt medallion pipelines transforming 10M+ records into 20+ KPIs (flight status, emergencies, traffic patterns) powering live Grafana dashboards.

Github
- LogWeave - Apache Kafka, rsyslog, Python, PostgreSQL, Docker, Grafana

– A home-network observability pipeline capturing, structuring, and analyzing real-time router telemetry.

Built a Kafka-based streaming pipeline ingesting router syslogs, normalized via rsyslog, enabling 24/7 monitoring of WiFi stability, WAN uptime, and error trends.

Github

TECHNICAL SKILLS

- Data Engineering & Orchestration: Apache Airflow, dbt, Apache Kafka, Databricks

Cloud Services: Snowflake, AWS (S3, Lambda, Athena, Glue, Redshift, Secrets Manager), Databricks Workflows

Programming & Scripting: Python, SQL, JS

Data Processing: Pandas, PySpark, Polars, DuckDB, Numpy

Development & DevOps : Docker, GitHub Actions, Git, Linux/Shell scripting

EDUCATION

- Graphic Era (Deemed to be) University

Bachelor of Science (Hons.) Computer Science

Dehradun, Uttarakhand, India
2020 - 2023

HONORS AND AWARDS

- Outstanding Award for exceptional adaptability, reliability, and quality delivery.

Applause Award for diverse contribution, ownership, and delivering successful releases.

Applause Award for high-quality delivery, adaptability, and creative problem-solving.

May, 2026
January, 2025
August, 2025

CERTIFICATIONS

- SnowPro Core Certificate

April, 2025
